

# Confluence 5 Pagetree

The "Confluence 5 Pagetree" extension integrates the good old pagetree into the new Confluence 5 default theme and its new sidebar.

## Please note

The page tree has returned with Confluence 5.2. You need to upgrade the [Confluence Space Sidebar](#) to version 6.1.13. After that you can configure your sidebar to display the page tree (even without CUTE...)

## Features

- Pagetree available in the sidebar of the Confluence
  - the whole space page hierarchy is visible
- Compatible to other Extensions

## Download and Compatibility

Extension Version	Date	Compatibility with Confluence	Download	Comment
2.0.4	2013-08-20	5.x	<a href="#">confluence.5.pagetree_2.0.4.cute</a>	<ul style="list-style-type: none"> <li>• Pagetree Plugin Compatibility 2.2.1 support added (works now with Confluence 5.2 also)</li> </ul>
2.0.3	2013-08-19	5.x	<a href="#">confluence.5.pagetree_2.0.3.cute</a>	<ul style="list-style-type: none"> <li>• Pagetree Plugin Version 2.3 support added (works now with Confluence 5.2 also)</li> </ul>
2.0.2	2013-05-28	5.x	<a href="#">confluence.5.pagetree_2.0.2.cute</a>	<ul style="list-style-type: none"> <li>• Pagetree now has a little Headerline</li> </ul>
2.0.1	2013-05-27	5.x	<a href="#">confluence.5.pagetree_2.0.1.cute</a>	<ul style="list-style-type: none"> <li>• Bloglisting now keeps its blogtree in the sidebar</li> </ul>
