

# Subscription and Licensing (Cloud)

For the following steps you need Confluence Site Administrator permissions.

## Other Versions

- [Release Cloud](#)
- [Release 3.x](#)
- [Release 2.0](#)
- [Release 1.7.4 and prior](#)

## Subscribing the Add-on

The add-on is available at the [Atlassian Marketplace](#). To subscribe the add-on, log into your Confluence as a site administrator and navigate to the "Find New Add-ons" tab in the global settings. There you simply search for "SubSpace Navigation for Confluence". For more details about the Universal Plugin Manager please refer to the [documentation provided by Atlassian](#).

## Licensing the Add-on

The add-on needs a valid license, otherwise features might not work. Valid licenses are subscriptions or 30-day trials and are available at the [Atlassian Marketplace](#). The license model is the same that Atlassian uses for its products – for further information see the [Atlassian documentation](#).

To obtain a license and apply it for the add-on, please carry out the following instructions, (also see the screenshot above):

- Go to the license settings page (ConfluenceAdministration -> "Manage Add-ons" or similar tab - > Extend the add-on "SubSpace Navigation for Confluence")
- Use the links to create a new license at the Atlassian Marketplace - use "Start Trial" to get a new trial license. After your trial ends you will be billed for this add-on.
